Subject: Media Questions about Water Quality & EPA Activities

Rachel:

I wanted to make you aware of a message I got from Lauren Cross from the NWI Times. Lauren Cross's voicemail expressed concerns about water quality in Zones 2 and 3, saying that she heard that there is lead in the water from lead service lines and the EPA's remediation activities.

As we know, this is the exact opposite of what the Water Quality Pilot Program revealed. Also, the City Water Department has continued to meet all water quality standards.

I don't really have time to put on my Public Relations hat today, but this needs a response. I am hoping that you can respond on behalf of the EPA. Here's Miss Cross's information:
